New name, continuing success

POLYMETRIX gains further market share with its new sustainable SSP technology

March 2015, Martin Müller

In the past twelve months, Bühler Thermal Processes AG has been awarded more than 15 new contracts from customers in all major regions. As POLYMETRIX we design, engineer, supply and build these new plants with a total capacity of 2.8 million metric tons of PET per year. Moreover, POLYMETRIX currently also builds various new plants in the fields of PET recycling, polyamide conditioning and SSP as well as SSP for PBT.

Just this month, a customer in Asia entrusted POLYMETRIX with an order for the world's largest PET plant based on the trend-setting EcoSphere™ SSP technology. The plant will go on stream in the second quarter of 2016 producing 1.2 million metric tons of bottle grade PET per year at most competitive conversion cost.
